Inland Route CDF

Project Features

- Inland Route CDF is an upland facility in Brutus, MI. The CDF is located north of the Crooked River near the outlet into Burt Lake.
- Navigation Project Served: Inland Route
- The CDF was constructed in 1982 under authority from Section 123 and has less than five years of capacity remaining.
- Inland Route CDF has an area of 9 acres, has a total capacity of 19,500 cubic yards, and receives about 285 cubic yards annually.
- The CDF is owned by the State of Michigan and is operated by the US Army Corps of Engineers.

Beneficial Use Information

- The material in this site has a mixed grain size.
- Direct transportation access to the CDF is available via road only.
- The US Army Corps of Engineers has the authority to remove or sell material from this CDF. Interested parties can contact Mr. Steven Thompson at Steven.W.Thompson@usace.army.mil.

Post Closure Use

- The post closure use of Inland Route CDF is intended for a wildlife area.
